## ABOUT ME

I am a versatile and creative Full Stack Web Developer with a particular interest in using React and Typescript to design and implement intuitive and user-friendly systems.

With 2+ years of retail experience and background in Ancient Art History and Civilisation, I bring unique and valuable insight to every project I take on. My previous research of Bronze Age rituals has provided me with a deep understanding of the importance of storytelling in design, as well as a critical perspective on diverse needs and viewpoints of different groups.

## EXPERIENCE

### TRAINEE | DEV ACADEMY AOTEAROA

01/2023 - 05/2023

- A 15-week immersive, full-stack web development bootcamp, where we applied **agile methodologies** to simulate real-world engineering teams, and build group projects. Throughout the program, I honed my technical skills in technologies such as **HTML5, CSS3, Typescript, JavaScript, React, Redux, Knex, SQLite3, Node.js, and Express.js**.
- There was significant emphasis placed on Human Skills, through which we deepened our understanding of **Non-Violent Communication, communication, empathy and wellbeing**.
- Each week, we worked in pairs, or groups, to deliver full-stack projects, including my final project, SubMinder: A subscription tracking app which allowed you to create, edit and delete paid subscriptions and free trials.
- I was the **product owner** of SubMinder, and led our team of six. I gained valuable project management skills, such as **setting the minimum viable product (MVP), delegating tasks, and collaborating with team members** to achieve a shared vision.
- In one week, my team and I built the full stack app using the tech stack we had learnt. I explored multiple React packages and decided on using **toast-ui/react-calendar** and **google forms**.
- I also built a prototype for an iOS app using **React Native**.

### ENGINEERING INTERN | BOARDPRO

09/2022 - 11/2022

- I contributed to the QA of the web app by **performing regression and smoke testing, and documenting the outcomes in Jira**. This culminated with an important version update where I tested the production environment to ensure a smooth deployment.

- I organised the team's documentation by learning their tech stack and archiving expired information. I extensively researched **agile methodologies** to write their team handbook.
- Through self-directed research, I completed a **governance training course and learnt HTML5, CSS3 and JavaScript** to build and present a CEO report form to go on the company's website.

## ASSISTANT MANAGER | BED, BATH 'N TABLE REMUERA

10/2021 - 09/2022

- I managed a team of staff, oversaw stock control, and ensured that customers received exceptional service. I also had the opportunity to **utilise my visual design skills by creating visually appealing displays** following principles of interior design.

## KITCHEN-HAND | DARUMA RAMEN COMMERCIAL BAY

06/2020 - 08/2021

- I had the opportunity to immerse myself in the world of Japanese cuisine and work in a dynamic, high-pressure kitchen environment. I developed valuable skills in **time management, attention to detail, and the significance of working effectively in a team.**

## EDUCATION

### DEV ACADEMY AOTEAROA | AUCKLAND, NZ

*NZQA Level 6, Certificate of Applied Software Development*

01/2023 - 05/2023

### UNIVERSITY OF EDINBURGH | EDINBURGH, UK/REMOTE

*BA History of Art*

09/2018 - 04/2021

### YONSEI UNIVERSITY SUMMER PROGRAM | SEOUL, KOR

*East Asian History of Art & Korean language*

07/2019 - 09/2019

## HOBBIES & INTERESTS

My hobbies include, but are not limited to:

Gardening, archeology and ancient art history, painting, saxophone, macrame, hiking
